Meeting date: June 17
Item number: General Public Comment

Hello, as it is now June 15 and the mask mandate in California and San Francisco has mostly been lifted (with exemptions that don't include libraries), I would urge that mask wearing should NOT be required for vaccinated folks. Per the CDC, there is absolutely no reason that mask rules should continue for vaccinated patrons (of course, maybe there could be masks required in specific children's areas, but not in libraries).
